Who We Are :

Precitorq is a technology-driven startup specializing in innovative transmission solutions for electric vehicles (EVs) and robotics. And Aiming to establish Precitorq as a world-class brand in transmission products.

We're on a mission of making Innovative Products in Transmission, EVs & Robotics.

Shaping Tomorrow's **TORQUE**

Built in India, engineered for the world.

Why Choose Us?

Expertise:

In Designing compact & Reliable Transmissions.

Innovation:

Focus on developing cutting-edge solutions

Customization:

Ability to provide tailored solutions

Harmonic Drives

Known for zero backlash and excellent positional accuracy, our harmonic drives offer high torque and very high ratios in a single stage, all within a compact size for robotic and precision application.

Customized Drives

We design and manufacture customized gearboxes with spur or helical gears, tailored to specific requirements for electric applications.

Planetary Drives

Automotive EV Gear Drives
